[57] **ABSTRACT**

A chemical 2-(diisopropylamino)ethyl dimethylthiocarbamate as a simulant for use in place of VX nerve gas in decontamination studies.

2 Claims, No Drawings

A statutory invention registration is not a patent. It has the defensive attributes of a patent but does not have the enforceable attributes of a patent. No article or advertisement or the like may use the term patent, or any term suggestive of a patent, when referring to a statutory invention registration. For more specific information on the rights associated with a statutory invention registration see 35 U.S.C. 157.
